

$$\text{Hexagon} + \text{Circle} = \text{Pentagon}$$

$$\text{Circle} \times 4 = \text{Square}$$

$$18 \times 7 = \text{Triangle}$$

$$\text{Square} - 59 = \text{Hexagon}$$

$$\text{Circle} + \text{Triangle} = 154$$

$$\text{Pentagon} + \text{Circle} = \text{Hexagon}$$

$$\text{Square} \div 2 = \text{Triangle}$$

$$242 - \text{Pentagon} = \text{Triangle}$$

$$14 \times 12 = \text{Hexagon}$$

$$\text{Circle} + 132 = \text{Square}$$
